

# Farmers Electric Cooperative

A Touchstone Energy® Cooperative 

## Air Quality Equipment and Miscellaneous Appliance Incentives

**PLEASE PRINT: Complete ALL Sections and sign form to ensure proper and prompt payment of rebate. If more than one unit, attach separate forms.**

### MEMBER ADDRESS INFO (person receiving rebate)

First Name	Last Name	Account Number	Phone
Address	City	State	Zip
		E-mail Address	

### EQUIPMENT LOCATION INFO

Check if same address as above:

First Name	Last Name	Account	Phone
Address	City	State	Zip
		E-mail Address	

Check the ACCOUNT TYPE where equipment is located:

Residence Only       Farm Only       Apart. Bldg/Unit  
 Resid./Farm       Business Only  
 Resid./Business       Commercial/Indust.

Check if you are a builder/developer and building is not yet owned by live-in residents: "Spec Building"

### MEMBER AGREEMENT (Must Sign)

I verify that the above described equipment was installed on the date and location specified. I agree to all program requirements provided (either separately or on back of this form) and that my electric cooperative reserves the right to inspect all equipment and verify information before issuing a rebate.

# Terms and Conditions—Indoor Air Quality and Miscellaneous Appliances Program

**Program Offer:** The Program covers products purchased and/or services rendered on or after January 1, 2010.

## Eligibility Requirements:

1. Members must provide the Cooperative with proof of purchase.
2. There is a limit of one of each air quality system and two of each appliance per home.
3. Appliances must be connected and served by the Cooperative providing the incentive.
4. Whole House Air Quality Systems:
  - A. All Qualifying Systems must serve the entire conditioned space of the home. (i.e. Central air systems)
  - B. Qualifying Systems:
    - Electronic Air Filters – whole house systems tied to a central fan. Electronic air cleaners create a high-voltage charge that causes the tiny particles in the air to stick to the washable cells. They are particularly effective for the smallest particles.
    - Radon Abatement Systems – whole house systems with fan. The exact design of a mitigation system depends on the design and construction of the building, however, most systems will affect pressure relationships (using fan and exhaust system) between the building and the ground soil from which radon originates.
    - Heat/Energy Recovery Ventilators – central systems with internal fan system and separation of indoor and outdoor airflows. These units recover energy from exhaust air for the purpose of pre-conditioning outdoor air prior to supplying the conditioned air to the space, either directly or as part of an air-conditioning system.
    - Ultra Violet (UV) Air Purifiers - Whole house systems installed with central air handler. An ultra violet light installed in the duct of a central air handling system. The UV light can kill viruses, bacteria, and mold spores.
  - C. The following equipment DOES NOT QUALIFY:
    - Self-charging electrostatic air cleaners that slip into the existing filter slot. These are very effective for larger particles but are relatively inexpensive.
    - Portable air cleaners.
    - A forced air radon abatement system installed to remove radon from a sealed crawl space of a home.
5. Miscellaneous Appliances
  - A. High Efficiency Televisions—units must have a minimum 40" screen (measured diagonally) and have a CEE Tier IV efficiency level as established by the Consortium for Energy Efficiency (CEE). Televisions with specified CEE Tier levels can be found by searching a downloadable excel file that allows you to search by screen size and CEE Tier levels. See qualifying lists at <http://www.cee1.org/resid/rs-ce/rs-ce-main.php3>.
  - B. ENERGY STAR Dehumidifiers—must meet ENERGY STAR Criteria and be listed as an ENERGY STAR qualified product at the time of purchase. The ENERGY STAR lists of qualified equipment are updated periodically. ENERGY STAR listing for dehumidifiers and other appliances can be found at <http://www.energystar.gov>.

## Warranty Information:

The Cooperative makes no warranties, expressed or implied, with respect to equipment operation, material, workmanship or manufacturing. The Cooperative does not guarantee that a certain level of energy or cost savings will result from the use of products covered by this program.

## Limitation of Liability:

Participating Members agree that the Cooperative's liability, in connection with this Program, is limited to paying the Program Incentive specified (when all Terms and Conditions have been satisfied by the member). Under no circumstances shall the Cooperative be liable for any consequential or incidental damages resulting from participation in this Program. The Cooperative will not be responsible for any tax liability that may be imposed on the Participating Member as a result of the payment of Program Incentives.

## Participating Member's Certification:

Participating Member certifies that he/she purchased and installed the equipment listed in their application at their defined location served by the Cooperative. Participating Member agrees that all information is true and that he/she has conformed to all of the program and equipment requirements listed in the application.

## Program Changes/Termination:

While this rebate program will be in effect for an indefinite period, the Cooperative reserves the right to extend, modify (this includes incentive levels) or terminate this Program without prior or further notice. The member is responsible for checking with the Cooperative to determine whether the program has been changed or is still in effect.

## Other Conditions

The Cooperative reserves the right to inspect installations before issuing the rebate. If the application does not comply with the Cooperative's rules and qualifications, the rebate amount may be adjusted.

Members must apply for rebates within 6 months of the purchase date (as shown on the member's invoice). Past eligibility, however, does not guarantee that equipment will meet criteria for current programs in effect.
