

# RESIDENTIAL REBATES

**Farmers Electric Cooperative, Inc.**

A Touchstone Energy® Cooperative

## NEW HOME CONSTRUCTION

### All Star Home

\$500/home

#### Requirements:

- Energy-Efficient Home Construction: High performance insulation and windows.
- High Efficiency Heating and Cooling: Requires geothermal, cold climate air-source heat pump or ENERGY STAR® air-source heat pump.
- Efficient Electric Water Heating: Requires the installation of a heat pump water heater or geothermal assisted electric water heater.
- Electric ENERGY STAR appliances for clothes washer, clothes dryer, dishwasher and refrigerator.

### Premier Electric Home

\$200/home

#### Requirements:

- Standard air-source heat pump or better
- Electric resistance water heater or better
- Building shell checklist

## CREATE A HEALTHY HOME

**Keep it Well-ventilated**  
Ventilate bathrooms and kitchens; consider using whole house ventilation to supply fresh air and reduce the concentration of contaminants in the home.

**Keep it Contaminant-free**  
Reduce lead-related hazards in pre-1978 homes by fixing deteriorated paint, and keeping floors and window areas clean using a wet-cleaning approach. Test your home for radon, a naturally occurring dangerous gas that enters homes through soil, crawlspaces, and foundation cracks. Install a radon removal system if levels above the EPA action-level are detected.

**Thermally Controlled**  
Houses that do not maintain adequate temperatures increase the risk for inhabitants to be exposed to extreme cold or heat.

## WEATHERIZATION

### Requirements:

- Rebates based on heating source.
- Home must be built prior to 2000.
- Must be upgraded to existing home (new additions do not qualify).
- Project cost must be \$150 or more (labor costs for self-installed projects cannot be included).

### Electric Heat (with or without air conditioning)

Attic/Ceiling Insulation	60% up to \$600
Wall Insulation	60% up to \$600
Foundation Insulation	60% up to \$600
Infiltration Control	60% up to \$200
Duct Insulation/Sealing	60% up to \$200
Maximum rebate per home	\$2,200

### Central AC Only (non-electric heating)

Attic/Ceiling Insulation	15% up to \$150
Wall Insulation	15% up to \$150
Maximum rebate per home	\$300

LIHEAP Qualified, no LIHEAP covered costs  
(Same above requirements apply)

### Electric Heat (with or without air conditioning)

Attic/Ceiling Insulation	80% up to \$800
Wall Insulation	80% up to \$800
Foundation Insulation	80% up to \$800
Infiltration Control	80% up to \$200
Duct Insulation/Sealing	80% up to \$200
Maximum rebate per home	\$2,800

### Central AC Only (non-electric heating)

Attic/Ceiling Insulation	20% up to \$150
Wall Insulation	20% up to \$150
Maximum rebate per home	\$300

# FARMERS ELECTRIC COOPERATIVE REBATES

Contact Farmers Electric for the complete list of rebates and qualifications

## WATER HEATERS

Heat Pump Water Heater	
ENERGY STAR® Integrated Unit	\$650/unit
High Efficiency Electric Water Heaters	
Electric Resistance Unit	\$75/unit
(not less than 40 gal. tank - min. EF ≥ 0.90)	
Geothermal Assisted Storage Unit	\$150/unit
(not less than 40 gal. tank - min. EF ≥ 0.90)	
Beneficial Electrification(BE) Incentive	
Go Electric Bonus	\$100
When a resistance or HPWH unit is replacing a natural gas or LP unit, or for new accounts.	

## ELECTRIC VEHICLE LEVEL II CHARGERS

The cooperative will rebate 50% of the installed cost, up to \$500, for Level II chargers requiring a 240/208 volt input supply. The primary charging location of the vehicle must be at the home address of the distribution cooperative member. Wiring rebates may also be available to offset cost of Level II charger installation. Contact Farmers Electric to learn more.

## HEATING & COOLING

Heat Plus Rate	
Per Home	\$100
Per Apartment	\$50
Requires separate meter, supplied by member.	
Groundsource Heat Pump	
Closed Loop System	\$400/ton
Open Loop System	\$300/ton
No “pump & dump” systems	
Hybrid System with Gas Backup	Add'l \$100/ton
Unit Replacement	\$150/ton
Air-Source Heat Pump, Including Minisplits	
Cold Climate Heat Pump	\$400/ton
Standard Air-Source Heat Pump	\$200/ton
Hybrid Air-Source Heat Pump Bonus	\$100/ton
ENERGY STAR Bonus	\$250/unit
Min. SEER 15.0, HSPF 8.2, EER 12.5 - Split system	
Min. SEER 15.0, HSPF 8.2, EER 12 - Single package	
ENERGY STAR Central Air Conditioning	
ENERGY STAR qualified	\$100/unit
Min. SEER 15.0 & EER 12.5	
Limit two air conditioner rebates per residence.	
Indoor Air Quality	
Energy/Heat Recovery Ventilator	\$250/unit
(ERV/HRV)	
Equipment must serve the entire conditioned space of the home. Limit of two HRVs per home.	

## ENERGY STAR APPLIANCES

ENERGY STAR Clothes Washer	
ENERGY STAR qualified	\$40/unit
(must have electric water heater)	
ENERGY STAR Electric Clothes Dryer	
ENERGY STAR qualified	\$20/unit

### Single Family Home Energy Consumption

Removing any window AC unit for the winter months prevents heat from escaping your home and wasting energy. Add this to your annual fall winterizing chore list to help save money.

### Why Electrify?

Heating is the largest energy use for homes in Iowa and provides the biggest opportunities to save. When properly installed, an ASHP can deliver one and a half to three times more heat energy to a home than the electrical energy it consumes (Source: U.S. Department of Energy). As a result, some of these systems can provide heat at a higher efficiency and lower cost than electric resistance heating, oil, or propane heating systems—and in some cases, for a lower cost than gas heating as well.
